

PUNISHR

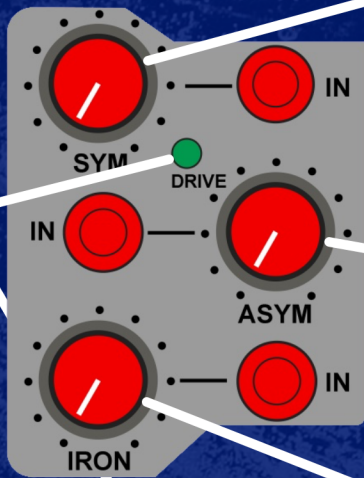

QUICK START GUIDE

Malcolm Toft

PUNISHR

www.malcolmtoft.com

made in England

SYM

Symmetrical Distortion

Both sides of the waveform are clipped

ASYM

Asymmetrical Distortion

One side of the waveform is clipped

IRON

Transformer Saturation

Saturates a specially chosen Iron Transformer

DRIVE

Set Input Level

LED Illuminates when level is a steady 0dbm

SUM

Distortion SUM

Feeds input to all 3 Distortion Circuits simultaneously

EQ PRE

EQ PRE

Moves the EQ section in front of the Distortion

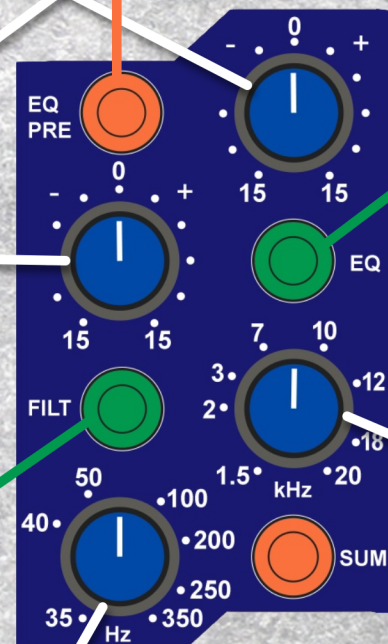

► Each of the three types of **PUNISHR** distortion have their own illuminated bypass switch so their individual effect can be easily compared.

► The **PUNISHR** has automatic gain levelling circuitry. The signal level does not increase when any or all of the three different types of distortion are added.

EQ 8 kHz +/- 15db

EQ 100 Hz +/- 15db

FILTERS IN

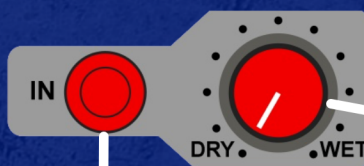

EQ IN

DRY / WET

DRY / WET

Continuously Variable Dry / Wet Blend Control

IN / OUT

HPF

HIGH PASS FILTER

Sweepable Filter from 30Hz to 350Hz

LPF

LOW PASS FILTER

Sweepable Filter from 1.5kHz to 20kHz
